

# El Camino Hosts Chemistry Group

Chemistry instructors from 12 western states will meet at El Camino College tomorrow for the first western regional meeting of the Two-Year College Chemistry Conference.

The meeting, being held in conjunction with the Los Angeles conference of the combined Southwestern-Southeastern regional meeting of the American Chemical Society, was announced today by William T. Mooney, dean of the El Camino division of physical sciences.

The Two-Year College Conference is to be attended by representatives of all types of two-year colleges, including junior and community colleges, technical institutions, extension centers, and lower division branches of major universities.

Mooney, who will chair the conference, said the meeting is "designed to promote the interchange of ideas and information among two-year college chemistry faculty members."

# Two Street Easements Approved

Easements for the widening of two streets adjacent to the Meadow Park Elementary School were granted to the city of Torrance Monday by the Board of Education.

The board approved a 10-foot easement on Lomita Boulevard and a 5-foot easement on Ocean Avenue. A request for an additional 2-foot easement on 230th Street was denied because school officials do not want to decrease the size of playground area.

Installation of curbs, gutters, and pavement, and other work on the easements will be done at no cost to the school district, according to S. E. Waldrip, assistant superintendent of schools for business.

# Magnavox, Xerox Announce Facsimile Marketing Plan

Agreement between The Magnavox Company and the Xerox Corporation covering the manufacture and marketing of a newly developed facsimile device called the Magnavox 840 was announced today by Frank M. Freimann, president of Magnavox, and Joseph C. Wilson, president of Xerox.

In accordance with the agreement, The Magnavox Company will be responsible for the manufacture of the equipment and the Xerox Corporation will be responsible for its marketing, sales, installation, and field services. The arrangement is world-wide in scope and the initial order is for 25,000 units. No further terms of the agreement were disclosed.

A single two-way unit, the Magnavox 840, is a graphic communications system that is portable — no longer than an office typewriter — yet it is capable of transmitting and receiving letters and other graphic documents by acoustic coupling with any conventional telephone. No wiring into the phone circuits is needed and the device plugs into a conventional 110 volt power outlet.

Only ordinary papers and carbon sets are required, and

transmission of letters, drawings or pictures covering a full page can be made in about six minutes.

Because of its low operating costs, the new product is expected to find a mass market in both large and small offices, the executive reported.

A Magnavox invention, the Magnavox 840, has been under development, design, and field test, including transmission from telephone booths, for four years. It does not require special telephone circuits for perfect transmission but will operate over any telephone that provides normal voice intelligibility. To transmit a document with a telephone call, the sender has only to place the original in his machine and call the intended receiver about it. Instantaneously, a true facsimile is on its way.

Xerox said that prices, marketing plans, and public demonstrations of the new non-xerographic product will be announced during the first quarter of 1966.

# Two-Period Vocational Class Eyed

Plan to experiment with double-period vocational courses in the city's four high schools next fall were approved by the Board of Education Monday evening.

Under the program, Dr. Albert Posner, assistant superintendent of schools for instruction, said pilot programs will be established in schools where sufficient space is available. The double-period program will enable students enrolled in vocational courses to spend two consecutive hours in the classroom.

Dr. Posner said the plan might be tried in an automobile shop, a secretarial skills laboratory, or other vocational course where class space and time is available.

Trustees also authorized Dr. Posner to investigate the possibility of getting additional state or federal funds for the double-period program. Such funds, Dr. Posner said, may be available for use in purchasing additional equipment for the program.

# Dominguez Hills Bank Will Open

Bank of America's new Dominguez Hills branch will be open for business Monday, according to Kenneth Durian, manager of the new branch.

Ceremonies marking the opening of the bank will be held at 9:50 a.m. Following the ribbon cutting ceremonies, the bank will open for a "bankwarming" which is scheduled to end at 3 p.m.

The branch is located at 18511 S. Avalon Blvd. Refreshments will be served and free souvenirs will be given to both children and adults.

A guessing contest will be held with the winner taking home a "sample" from the bank — a \$50 savings bond. Contestants only have to guess how many grains of "stardust" are in the payload of a miniature satellite to be displayed in the lobby.

The contest will run for two weeks with the winner being named Dec. 3. In addition to the top \$50 award, second and third place prizes of a \$25 and a \$10 savings bond will be awarded.

# Meeting on Bond Issue Scheduled

Trustees of the Torrance Unified School District will hold an adjourned meeting at noon next Tuesday to complete requirements for the Feb. 8, 1966 school bond election.

The meeting was scheduled to permit the board to act on formal resolutions establishing the amount to be asked, select precinct and polling places, and appoint election officials.

Trustees previously have established the amount of the general school bonds to be sought at \$12,500,000. A second bond proposal which seeks \$1,000,000 for the construction of swimming pools on each of the city's high school campuses will be on the ballot.

Next Tuesday's meeting has been called to complete formal action on the two proposals.

# Medicine, Not Gimmicks, Key to New Health Club

There are no gimmicks and you must have the approval of a doctor, preferably your family doctor.

Only when the doctor says "okay" will Irwin S. Paris let you into his new health club.

Paris and his partner, Hugh Pendleton, own and operate the Paris Medical Health Club at 4305 Torrance Blvd. The club is more than an ordinary gymnasium which helps you to lose weight through exercise.

THE IDEA behind the Paris Medical Health Club is to develop strong minds and strong bodies without gimmicks.

"Exercise — using your body in an intelligent way — is medicine, good medicine," Paris says.

The plush health club has mirrored walls, thick red carpets, the latest equipment, a sauna bath, and a health food snack bar. Paris and Pendleton, both registered physical therapists, develop individual programs according to the instruction given by the family doctor.

OPENING of the new club marks a unique turn in the world of body building. The facility combines the aspects of a gymnasium type body-building health club and the scientific know-how and close cooperation with medical men.

Paris, who just two years ago was teaching physical education at Peary Junior High School in Los Angeles, holds a masters degree from UCLA. He has researched his subject thoroughly and has some personal experience on both sides of the body-building issue. He came out of high school as a 100-pound "weaking" and a few years later became the 1951 Junior Mr. Los Angeles. Paris also holds the lightweight bench press record in weightlifting.

# Dodge! King of the Road

the only V-8 powered compact trucks in America!

Dodge is King of the Road in the compact truck field. Why? Because only Dodge can offer a proven V-8 engine that outperforms all comers. Test drive a V-8. Here's the power you need to haul payloads, profitably. Power that allows you to cruise the freeways with reserve acceleration to spare. Power to climb a mountain road all day without over-heating.

And this handsome van is King when it comes to comfort. Only Dodge has foam and vinyl bucket seats as standard equipment! And special heavy-duty springs for leveling loads and smoothing the ride.

And to top it off, when you go Dodge, you get the Warranty-King—the famous 5-year or 50,000 mile warranty, longest and strongest in the business! Price? Competitive—and then some.

**DODGE "KING OF THE ROAD" EXCLUSIVES:**

- 5-YEAR/50,000 MILE WARRANTY\*
- LARGEST BRAKES of any compact—self adjusting tool
- BIGGEST WHEELS of any compact—15 inch truck size!
- BUCKET SEATS—vinyl covered foam—standard equipment!
